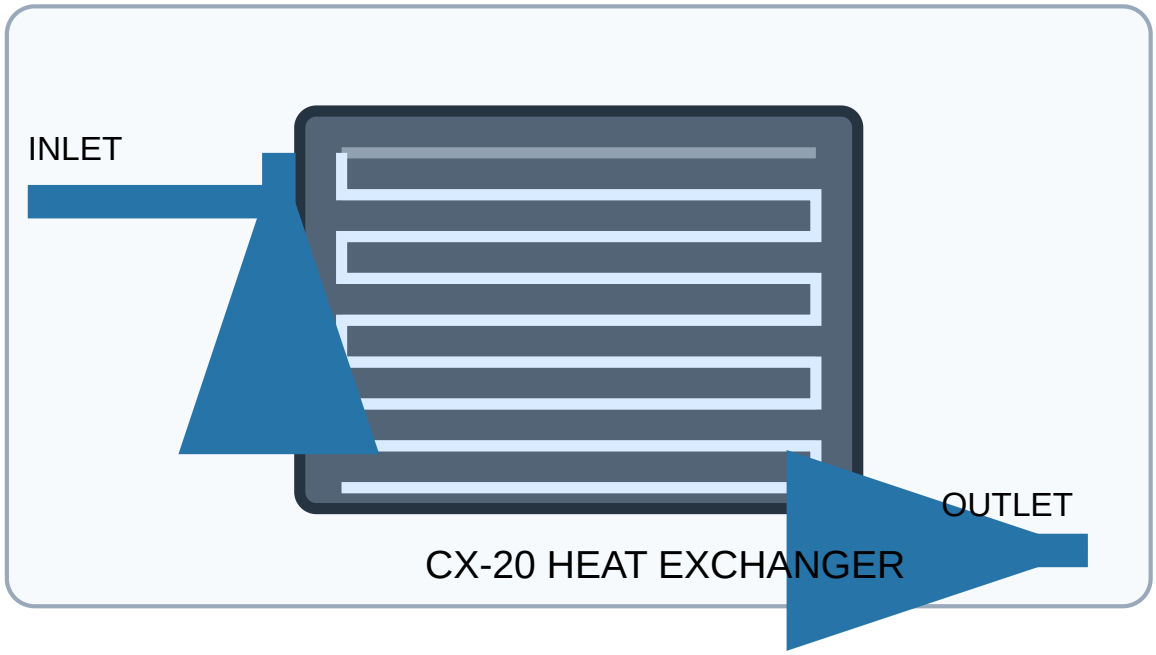
SERVICE DIAGRAM · VISUAL-ONLY TERMINOLOGY TEST

Radiator cooling assembly CX-20



This plate diagrams the radiator core and coolant passages.

TEXT-ONLY PROCEDURE

Water pump replacement procedure

1. Isolate the electrical supply and close the upstream valve.
2. Remove the WP-450 coupling guard and drain the casing.
3. Install replacement reference AF-P-1042 and align the motor shaft.
4. Prime the centrifugal pump before restarting the system.
